

**Youth Programs
Committee Report**

2006 Mid-Year Report

August 24, 2006

Chair: Mr. Erik Risa
Vice Chair: Dr. Paul Kuber

The Youth Programs Committee's last meeting was at the NIAA annual meeting in Louisville, KY. At the Youth Programs committee meeting no change or revision was made regarding the mission or objectives, and no resolutions were passed.

The Youth Programs Committee's focus on a specific audience is unique when compared to other NIAA issues-based committees. However, each committee's work is of interest to the Youth Committee, as issues arise the youth are impacted with various industry changes.

Therefore, emphasis the committee is not one that focuses on any one species, or any one topic but becomes one that can facilitate an exchange of information. This exchange of information or educational delivery will focus on youth producers of all production sizes, and will explore the current and new delivery techniques that are proven to be effective delivering information to youth audiences.

Seminar topics for the next committee meeting at the annual meeting will likely include, but not be limited to:

- Multispecies programs and resources currently available
- Exploring electronic education materials
- Adult vs. youth learning styles
- Premises registration for youth

The Youth Programs Committee chair and vice-chair will debate and discuss the most appropriate topics for the annual meeting. If committee members or other have input please contact Erik Risa or Dr. Paul Kuber.
